SAFETY: REDUCE CHRONIC MALTREATMENT

Chronically Referring Families

Proportion of families meeting one or more of the criteria for the Kids Come First chronic screener (multiple referrals, multiple foundeds, multiple sexual or physical abuse allegations, young or impaired biological mother, or certain combinations of risk factors for child and/or caregiver – see Appendix S-1 for details).

NOTE: This measure adds additional criteria to the multiple referrals measure previously reported, to better identify families either chronically referring or at substantial risk of becoming chronically referring. Because of the additional criteria, the overall percentage of families identified as "chronic" is higher than in the previous multiple referrals measure.

State and Regional Trends

Proportion of "Chronic" Families (Number meeting screening criteria)

Region	Previous FY (FY 2000)	Current FY to date (FY 2001)	Current Quarter (Apr-Jun 2001)
1	24.4% (940)	23.7% (934)	25.9% (309)
2	26.0% (874)	24.3% (917)	26.8% (325)
3	17.7% (884)	18.0% (925)	19.9% (313)
4	17.5% (1079)	18.1% (1034)	19.1% (332)
5	23.0% (1002)	22.4% (986)	24.2% (320)
6	24.6% (1338)	24.3% (1264)	28.0% (439)
State Total	21.7% (6119)	21.5% (6065)	23.7% (2038)

Safety: Reduce Chronic Maltreatment

Chronically Referring Families:

Proportion of families meeting one or more of the criteria for the Kids Come First chronic screener (multiple referrals, multiple foundeds, multiple sexual or physical abuse allegations, young or impaired biological mother, or certain combinations of risk factors for child and/or caregiver – see Appendix S-1 for details).

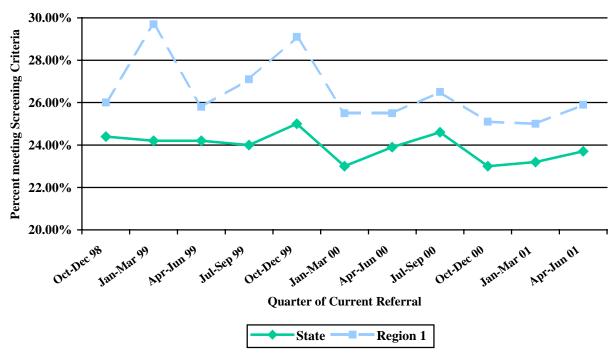

NOTE: This measure adds additional criteria to the multiple referrals measure previously reported, to better identify families either chronically referring or at substantial risk of becoming chronically referring. Because of the additional criteria, the overall percentage of families identified as "chronic" is higher than in the previous multiple referrals measure.

REGION 1

Proportion of "Chronic" Families (Number meeting screening criteria)

Office	Previous FY (FY 2000)	Current FY to date (FY 2001)	Current Quarter (Apr-Jun 2001)
Lincoln County	18% (11)	29% (11)	67% (4)
Newport	23% (24)	21% (24)	28% (12)
Wenatchee	19% (85)	25% (108)	29% (33)
Moses Lake	17% (48)	18% (62)	27% (26)
Omak	22% (66)	18% (41)	19% (12)
Spokane Central	26% (606)	25% (599)	26% (190)
Colville	26% (54)	20% (52)	19% (14)
Colfax	28% (40)	22% (36)	31% (18)
Regional Total	24.4% (940)	23.7% (934)	25.9% (309)
State Total	21.7% (6119)	21.5% (6065)	23.7% (2038)

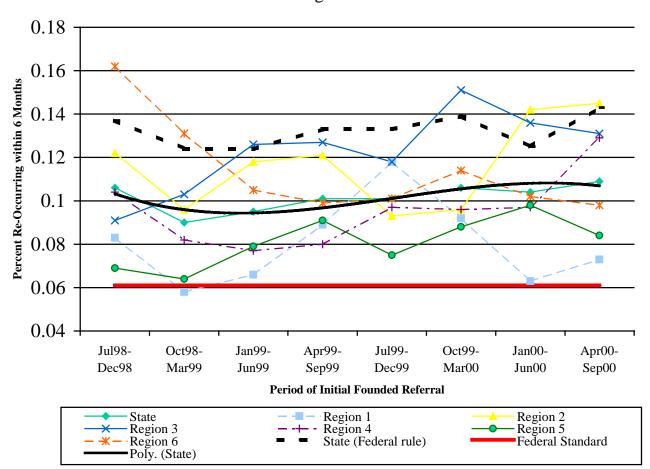

SAFETY: REDUCE RECURRENCE OF MALTREATMENT

Victim Recurrence:

Percent of CA/N victims who had another substantiated or indicated report within 6 months. Current and previous quarter used as 6-month entry cohort.

NOTE: This 6-month victim recurrence rate replaces the 12-month victim recurrence rate previously reported, for consistency with a similar change in the Federally reported NCANDS measure. Founded referrals are not counted as separate occurrences unless they are received more than ten days apart. The State trend in the Federal measure, which does not allow use of this exclusion, and the Federal practice standard, are also shown for reference.

State and Regional Trends

Recurrence Rates (Number of Recurrences)

		Period of Initial Founded Refe	erral
Region	FY 1999	FY 2000	Apr 2000 – Sep 2000
1	7.4% (84)	9.2% (98)	7.3% (36)
2	11.5% (110)	11.4% (110)	14.5% (72)
3	11.4% (117)	12.8% (114)	13.1% (60)
4	9.0% (96)	9.0% (101)	12.9% (69)
5	7.6% (82)	8.7% (96)	8.4% (53)
6	13.1% (156)	10.2% (127)	9.8% (58)
State Total	10.0% (645)	10.2% (649)	10.9% (348)

Calculation Notes: see Appendix S-2

Safety: Reduce Recurrence of Maltreatment

Victim Recurrence:

Percent of CA/N victims who had another substantiated or indicated report within 6 months. Current and previous quarter used as 6-month entry cohort.

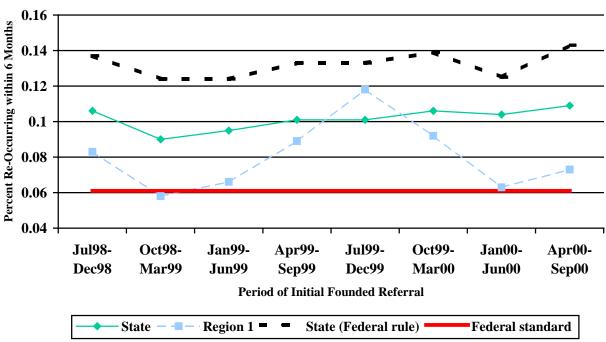

NOTE: This 6-month victim recurrence rate replaces the 12-month victim recurrence rate previously reported, for consistency with a similar change in the Federally reported NCANDS measure. Founded referrals are not counted as separate occurrences unless they are received more than ten days apart. The State trend in the Federal measure, which does not allow use of this exclusion, and the Federal practice standard, are also shown for reference.

REGION 1

Recurrence Rates (Number of Recurrences)

	Period of Initial Founded Referral						
Office	FY 1999	FY 2000	Apr 2000 – Sep 2000				
Lincoln County	0% (0)	0% (0)	0% (0)				
Newport	16% (3)	10% (2)	17% (2)

State Total	10.0% (645)	10.2% (649)	10.9% (348)				

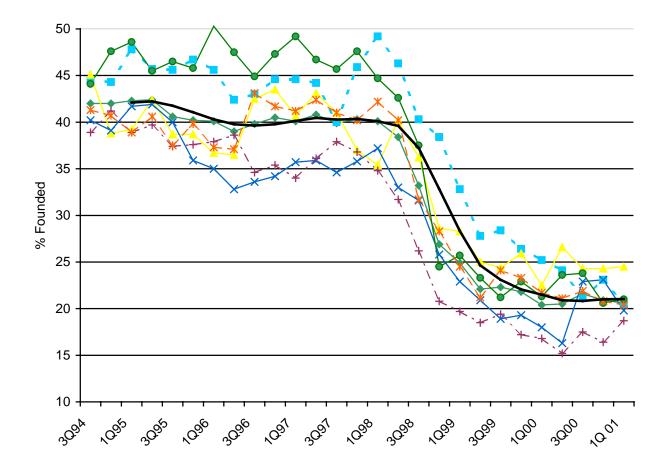

Region 1 & State Trends

TRENDS IN FOUNDED RATE

For reference, the state and regional founded rates are also shown here, going back to the 3rd quarter of 1994. The victim recurrence rates will decline if the founded rate declines, independent of any changes in practice that may affect the recurrence rates.

Note: An earlier error in linking Investigations with pre-Investigations Module summary assessments resulted in a slight error in the Founded rates. The trend below has been corrected for this error and supercedes the founded rates given prior to the February 2001 monthly report. The actual founded rate for 1999-2000 is slightly lower than previously reported.

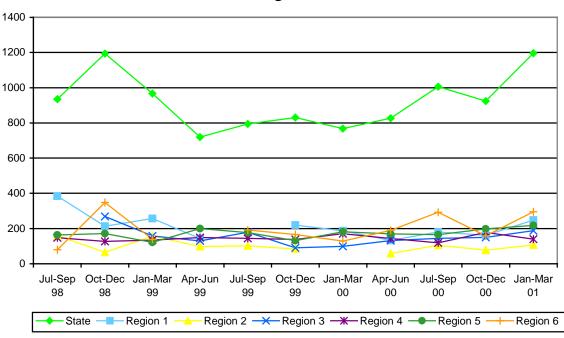

SAFETY: REDUCE RECURRENCE OF MALTREATMENT

Child Protection Teams:

Number of cases staffed with Community Protection Teams. (The data reflects the number of children staffed with CPT's. CA will transition to a count of cases staffed over the next few months).

	State	Region 1	Region 2	Region 3	Region 4	Region 5	Region 6

Safety: Timely Investigations

DLR/CPS Investigations:

Percent of high standard CPS investigations where child is seen within 10 calendar days OR 24 hours from the date of the referral (per policy).

State - DLR/CPS Timely Investigations

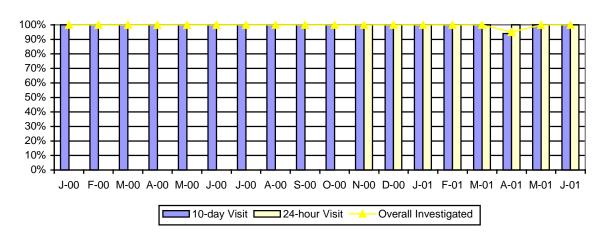

Safety: Timely Investigations

DLR/CPS Investigations:

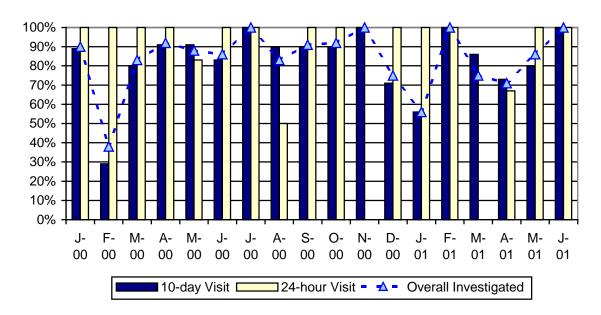

Percent of high standard CPS investigations where child is seen within 10 calendar days OR 24 hours from the date of the referral (per policy).

REGIONS 1 & 2

Region 1 - DLR/CPS Timely Investigations

Region 2 - DLR/CPS Timely Investigations

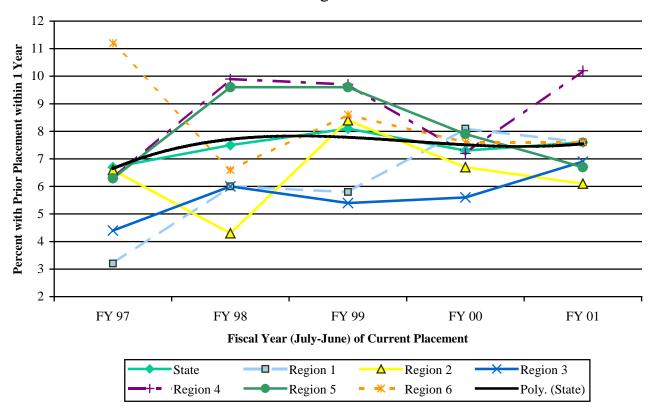

SAFETY: REDUCE CPS PLACEMENT RE-ENTRY

Prior Placements:

Percent of children currently in a CA/N-related placement who had a previous CA/N-related placement in the prior 12 months. (only counts children placed > 72 hours).

NOTE: This measure is now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The trend was re-calculated in September, 2001. Trends are determined at fiscal year intervals to allow meaningful interpretation of changes in this measure.

State and Regional Trends

Prior Placement Rate (Number with Prior Placements)

Region	Previous FY (FY 2000)	Current FY to date (all FY 2001)	Current Quarter (2Q 01)
1	8% (50)	8% (46)	3% (4)
2	7% (29)	6% (28)	8% (9)

SAFETY APPENDIX

S-1: Reduce Chronic Maltreatment

Calculation: Quarterly cohort of all accepted and alternative response referrals to CPS for each unique family case ID number. Past records then checked to see what proportion of this cohort have prior referrals in CAMIS that were received on the same case ID number more than ten days but less than three years before the received date of the initial referral. Referrals must be received more than ten days apart to be counted as separate referrals. Criteria for identification of families as "chronic": 3 or more referrals in the past 12 months, or 4 or more referrals in the past 2 years, or 5 or more referrals in the past 3 years; or two or more sexual or physical abuse allegations at investigation in the past six CPS referrals; or two or more founded allegations in the past six CPS referrals; or rated at moderately high or high risk for either one of young, vulnerable or developmentally disabled child, AND for caregiver's history of CA/N as a child, in any of the past six CPS referrals; or a biological mother under 21 years of age at the time of her first referral as the biological mother, or a primary caregiver rated at moderately high or high risk for caregiver emotional/physical/mental impairments, for families referred two or more times to CPS. These criteria were developed as a part of the Kids Come First initiative.

S-2: Reduce Recurrence of Maltreatment (Victim)

Calculation: Fiscal year or six-month cohort of founded referrals on individual victims (first founded referral received in that year for each unique victim person ID number); this cohort of victims followed forward in time for a 6-month period to see if an additional founded referral is received on the same person ID number (again, identified as a victim) more than ten but less than 366 days after the received date of the initial referral. An additional sixmonth lag time after receipt is also allowed for entry of the investigation information. The founded rates reported on this page are calculated from the investigations module: if any allegation for victims or subjects is founded, the referral is considered founded. If a referral predates the use of the investigations module, the old summary assessment findings code is used. The ten-day exclusion is used to (approximately) adjust the measure for the effects of receiving multiple referrals on the same incident. The Federal rules prohibit this adjustment, so the unadjusted State trend is also shown for reference in the State report. By reporting each quarter and using a six-month period each time, we are in effect averaging over two quarters for each reporting period. This smooths out fluctuations in the trends due to relatively small numbers of recurring victims, and makes the trends easier to interpret and more reliable indicators of actual changes in practice.

S-3: Reduce Recurrence of Maltreatment (Family)

Calculation: Fiscal year or quarterly cohort of founded referrals (first founded referral received in that year for each unique family case ID number); this cohort followed forward in time for a 12-month period to see if an additional founded referral is received on the same case ID number more than ten but less than 366 days after the received date of the initial referral. An additional six-month lag time after receipt is also allowed for entry of the substantiation decision(s).

S-4: Reduce CPS Placement Re-Entry

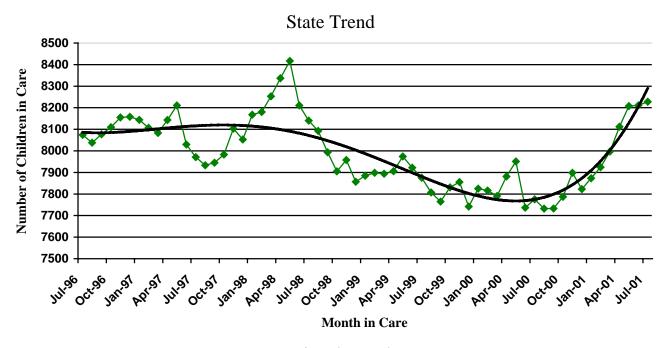

Calculation: Due to the lack of a direct link in CAMIS between referral and placement data, this measure is presently NOT defined with reference to CPS referrals. Until a more reliable link between CPS placement and referral information is developed, we report here as a temporary substitute a "look back" placement measure that determines the percent of children placed for reasons of CA/N (placement reasons of sexual abuse, physical abuse, neglect, abandonment, and inadequate housing other than homelessness) in a given current quarter for more than three days who had a previous placement episode with CA/N-related reasons lasting > 3 days that closed at least two days before and within 12 months of the start of the current episode. Prior and current placements with all outcomes are counted. As of the March 2001 report, this measure using placement reason codes replaced the previous measure that counted placements with CPS program codes; trends and office-level data were re-calculated using the reason codes back to the third quarter of 1996 (FY 1997).

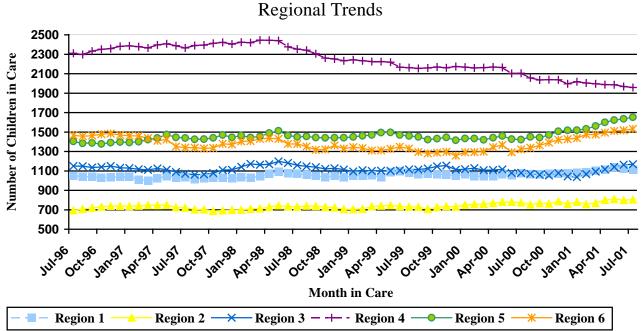

PERMANENCY: TRENDS IN PLACEMENT

Children in Out of Home Care:

Number of children in DCFS custody in open placement episodes in a given month with lengths of stay/time in care of > 60 days (in-home dependencies excluded).

NOTE: This measure was recalculated in September, 2001, following a large-scale data clean up effort in the field, and is also now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The previously reported statewide increase in number of children in placement was apparently due to a substantial number of incorrectly documented episodes, and in lesser part to the cumulative effects of improperly documented in-home dependencies: episodes of out of home care with the final event being recorded as an in-home dependency, then the episode left open.

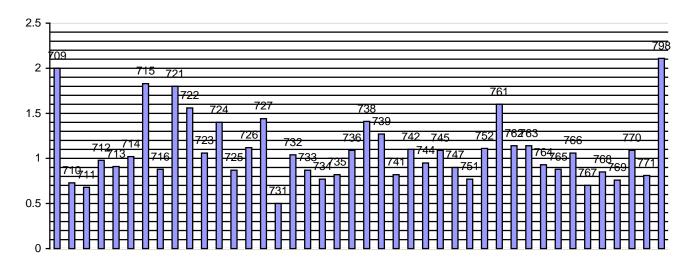

Office Entry/Exit Ratio:

Ratio of placement episode entries to exits for each office, for a given fiscal year, for DCFS-custody children with lengths of stay/times in care of > 60 days. In-home dependencies excluded.

NOTE: This measure is now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. Ratios for both fiscal years were re-calculated in September, 2001. FY 2000 ratios for some offices have changed substantially compared to the values previously reported.

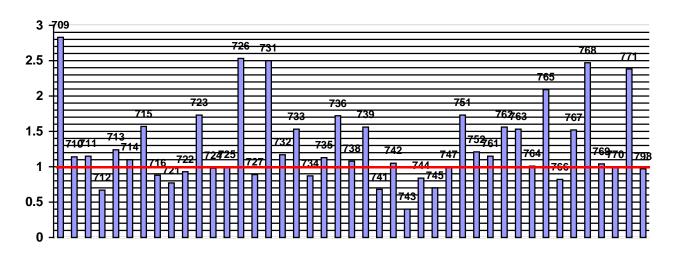

If the number of children entering placement exceeds the number exiting placement during the same period, the entry/exit ratio will be larger than one and the number of children in open placement episodes will continue to increase. Thus, offices with entry/exit ratios larger than one for a given fiscal year consistently have more children entering placement than leaving placement.

Office Entry/Exit Ratio, FY 2000

Office 737 (Friday Harbor): records indicate 3 entries and no exits in FY 2000

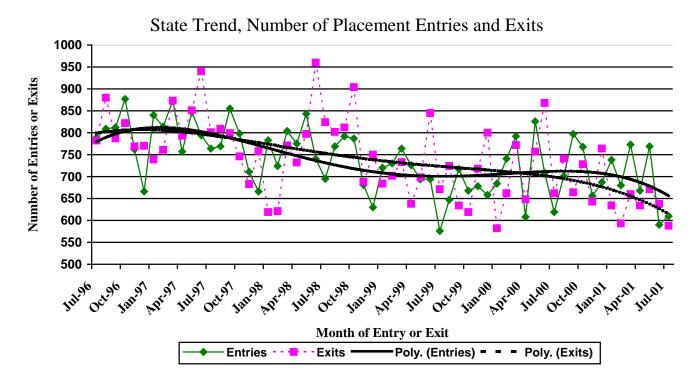

Office Entry/Exit Ratio, FY 2001

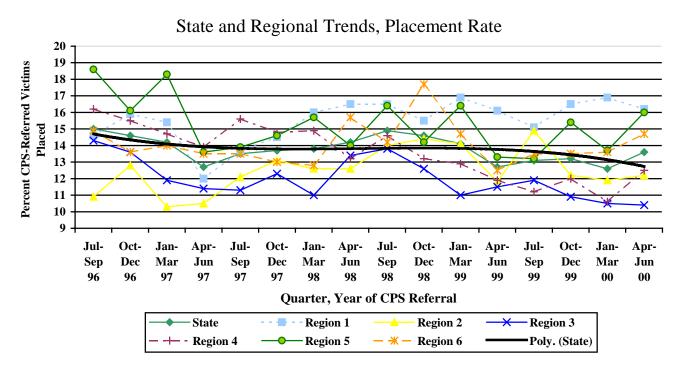

Number of Placement Entries, Exits, and Placement Rate:

Number of children in DCFS custody entering and exiting placement episodes in a given month, for all lengths of stay; and the proportion of investigated child victims in CPS referrals placed from three days before to 12 months after referral.

NOTE: These measures are now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The trends were re-calculated in September, 2001.

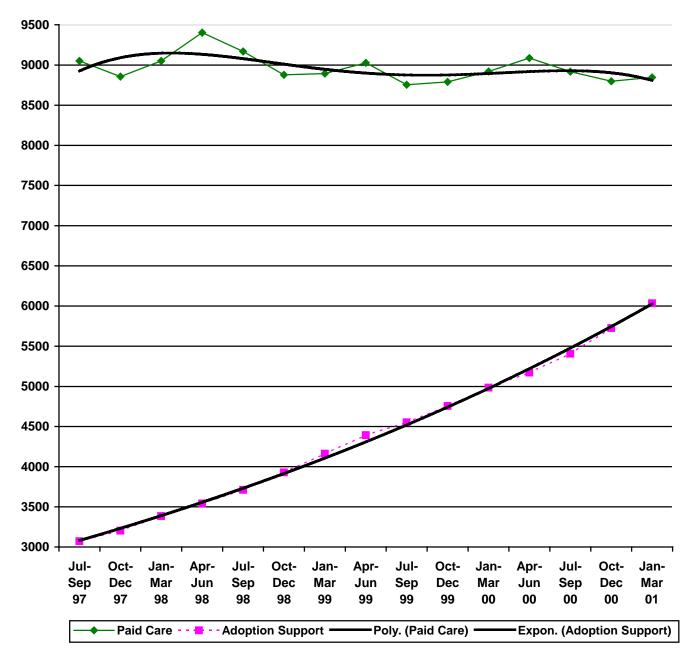

Number of Children in Paid Care and Adoption Support:

Number of children in paid care, for all custodies, types, lengths and costs of care; and number of children with adoption support. Reported as the (unduplicated) number of children receiving payments for care of any amount in a given quarter.

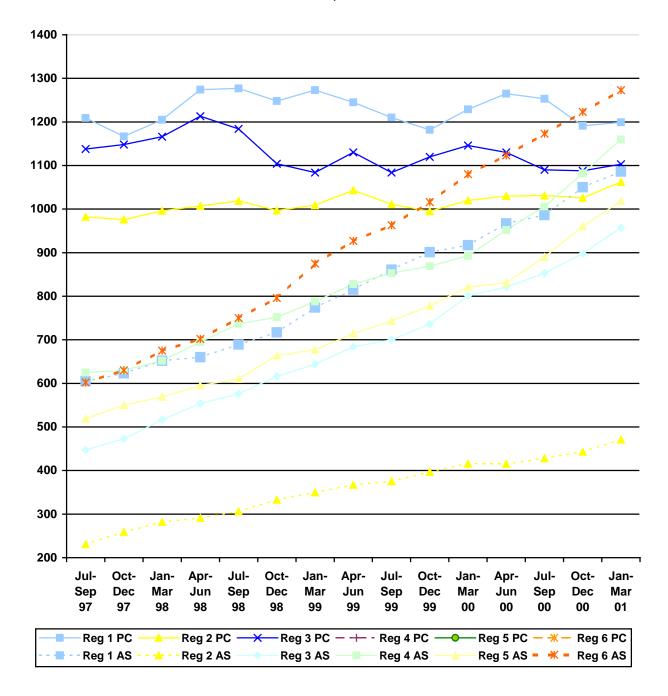

Number of Children in Paid Care and Adoption Support:

Number of children in paid care, for all custodies, types, lengths and costs of care; and number of children with adoption support. Reported as the (unduplicated) number of children receiving payments for care of any amount in a given quarter.

REGIONAL TRENDS, NUMBER OF CHILDREN

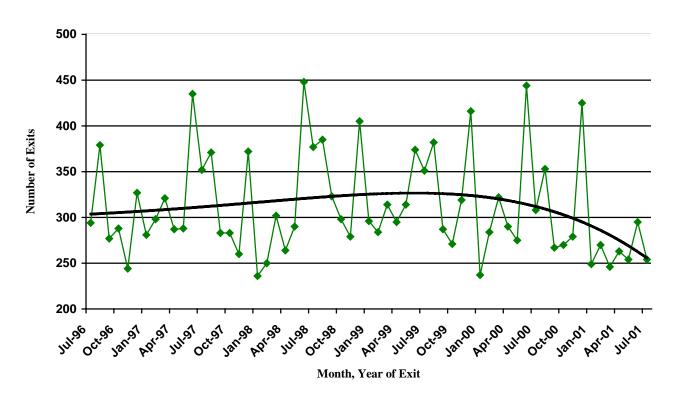

PERMANENCY: INCREASE PERMANENCY FOR CHILDREN IN OUT-OF-HOME CARE

Completed Permanent Plans: Adoption, Guardianship, and Reunification with LOS $> 60~{\rm Days}$

(Number of exits)

NOTE: This measure is now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The trends were re-calculated in September, 2001. Because these are counts of exits, they will not equal the number of children exiting in a given period.

State Trend

Number of Placement Exits (Adoptions, Guardianships, and Reunifications with LOS > 60 Days)

			Previous FY	Current FY to date	Current Month
Region	FY 1998	FY 1999	(FY 2000)	(July 2001)	(July 2001)

Completed Permanent Plans: Adoption, Guardianship, and Reunification with LOS $> 60~{\rm Days}$

(Number of exits)

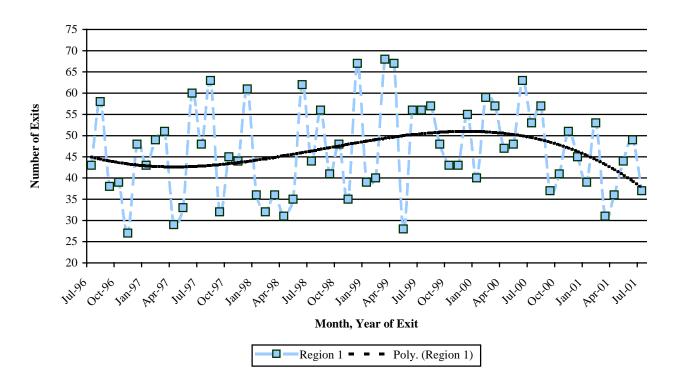

NOTE: This measure is now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The trends were re-calculated in September, 2001. Because these are counts of exits, they will not equal the number of children exiting in a given period.

> 4 yrs.	5		20%	40%	40%
Total (all times in care)	650	81%	8%	8%	4%

^{*} For FRS purposes, we report here a breakout for children aged 12-17 years at time of placement of all placement events, including hospital, juvenile detention, on-the-run, etc., for all times in care, to reflect some of the unique placement characteristics of juveniles placed by FRS. The numbers of children involved are typically too low for this time-in-care breakout to be meaningful at the regional level, but the number of events breakout for all times in care combined is reported for each region (see regional stability breakout pages).

Placement Stability: Percent of children with no more than 2 placements during time in care from entry through current reporting month.

Proportion of all those in care more than 60 days with no more than 2 placements per episode.

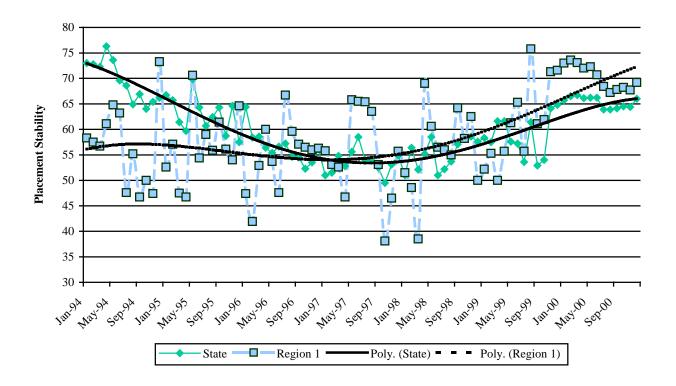

NOTE: This measure is currently under revision and the trend has not been updated.

PERMANENCY: DECREASE LENGTH OF STAY WITHOUT INCREASING RE-ENTRY

Percent re-entering care after reunification, guardianship, or adoption within 12 months of exit

NOTE: This measure is now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The reunification trend was re-calculated in September, 2001. Trends are determined at fiscal year intervals to allow meaningful interpretation of changes in this measure. Because the Federal calculation of this measure differs from our method in several respects, the Federal calculation of the State trend (which shows a slightly worse performance than our calculation method) and the Federal practice standard of $\leq 8.6\%$ are shown for reference. See Appendix P-3 for calculation details.

Re-Entry LOS >	30 Days; Initial Pla	aceme	nt LOS >	60 Days.	DCFS C	ustody On	ıly.		

Placement Re-Entry: Percent re-entering care within 12 months of reunification.

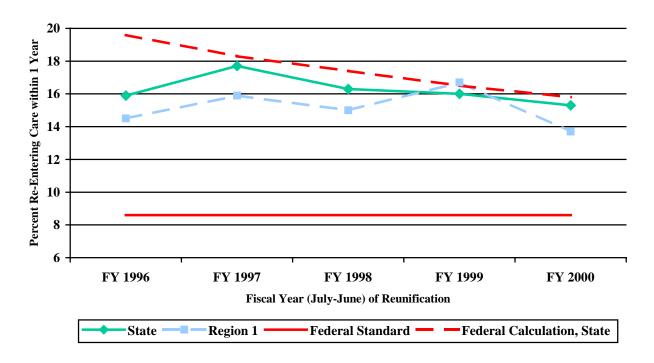

NOTE: This measure is now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The reunification trend was re-calculated in September, 2001. Trends are determined at fiscal year intervals to allow meaningful interpretation of changes in this measure. Because the Federal calculation of this measure differs from our method in several respects, the Federal calculation of the State trend and the Federal practice standard of $\leq 8.6\%$ are shown for reference. See Appendix P-3 for calculation details.

REGION 1 TRENDS

Percent Re-Entering following Reunification (Number of Re-Entries)

Placement Index = Number of placement events + number of episodes + cumulative years in care -1 for children in care > 60 days. Calculation Notes in Appendix P-4.

PERMANENCY: DECREASE OVER-REPRESENTATION OF MINORITY CHILDREN IN CARE

African American Children in Care Longer than Two Years who do not have a completed permanent plan.

Trends shown for the percentage of African American children in care > 2 years, of all African American children in care > 60 days. "African American" defined for this measure only as a child with African American indicated for any of the six race codes in CAMIS.

NOTE: This measure is now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The trends were re-calculated in September, 2001.

State and Regional Trends

Permanency: Decrease over-representation of minority children in care

Young Children Remaining in Care More Than One Year Since TPR

reported for minority and Caucasian children exiting or remaining in care, ages birth through three years at time of legally free date. "Minority" defined for this measure as all children except those indicated as Caucasian and only Caucasian; Hispanic Caucasians also included in "minority" group.

NOTE: This measure is now determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies. The trends were re-calculated in September, 2001. Children with adoptions and guardianships established during each cohort period are included in this measure of legally free children with permanent plans. Children in long-term foster care/relative agreements are as yet not identified and therefore cannot be counted as having a permanent plan; these children currently show as being in open episodes and add to the count of children in care for more than one year.

PERMANENCY: CONTINUITY OF FAMILY RELATIONSHIPS AND CONNECTIONS WILL BE PRESERVED FOR CHILDREN

Increase relative placements

Children in DCFS custody only; children in care more than 60 days at end of quarter in placement with unpaid or paid (licensed) relatives.

NOTE: The measure is determined using our new method of correcting placement episode records for incorrectly documented in-home dependencies, and now uses a 60-day cut for consistency with our other permanency measures and counts of children in foster care. The trends were calculated in October, 2001.

Proportion of Children in Placement with Relatives (Number in Placement) at End of Period

Region	FY 1999	Previous FY (FY 2000)	Previous Quarter (Jan-Mar 2001)	Current Quarter (Apr-Jun 2001)
1	29.8% (327)	30.0% (316)	31.5% (346)	32.0% (356)

PLACEMENT APPENDIX

P-1: Placement Stability

Calculation: A count of qualifying placement events that occur in the first 12 months of placement within episodes, using a quarterly or fiscal year cohort of children exiting care within 12 months, or remaining in care past the 12-month point. The following events are EXCLUDED from the count of events: respite, on-the-run, juvenile rehabilitation, detention, in-home dependencies, hospital, and events contiguous in time (after these events are removed) where the placement business ID has not changed. In addition, ANY type of event of less than 31 days duration that occurs between two events with the same business ID are excluded (only the first of such multiple "events" is counted). These exclusions are intended to create, as much as possible, a stability measure that only counts actual changes in a child's principal place of residence. The Federal rules for this measure do not allow all of these adjustments (only respite, in-home dependencies, hospital, and on-the-run events may be excluded) – therefore, although the numbers and trends we report are the best currently available estimate of actual placement stability, the calculation of this measure using the Federal rules indicates a lower level of performance, as shown in the graphs (roughly 4-5 percentage points lower). The older method of calculating this measure which counted events for children in open episodes regardless of their length of stay (not just for the first 12 months of placement) is also included until revisions to the placement stability measures are completed. However, it has not been updated to reflect the widespread changes in CAMIS placement records that occurred in the summer of 2001, nor corrected for the effects of improperly documented in-home dependencies.

P-2: Placement Time in Care/Length of Stay

<u>Calculation</u>: Proportions of all children in care > 60 days, reporting the monthly trend in the proportion of all children in *open* placements > 60 days who have been in care for more than two years. Length of Stay over a five year period also reported, for entry cohorts by fiscal year beginning in 1993, giving the breakouts by number of years in care.

P-3: Placement Re-Entry

<u>Calculation</u>: The Federal measure considers all lengths of stay, and is a "look back" measure of all children entering into care rather than a "look forward" measure for exit cohorts of children reunified. For our purposes, we determine this measure for children who re-enter care for > 30 days who had a previous episode of care lasting > 60 days. There must also be more than one day between the end date of the previous episode and the start date of the new episode for the new episode to be counted as a "re-entry." Fiscal year or quarterly exit cohorts used (cohort of children exiting placement in a given period, followed forward in time to see if they have a new episode that begins more than one but less than 366 days after the close of the previous episode).

P-4: Composite Placement Index

<u>Calculation</u>: Sum of placement events, (*excluding* respite, temporary, juvenile rehab, detention, in-home dependencies, on-the-run, hospital, < 5 days, and when business ID does not change for events contiguous in time); number of placement episodes (new episode must begin at least 2 days after close of previous episode to be counted); and total number of years spent in care. Formula subtracts one from result to shift minimum index value to zero. Calculated for children (DCFS custody only) in open placement for at least 60 days in a given cohort month.

WELL BEING: INCREASE CASEWORKER VISITS WITH CHILDREN IN OUT-OF-HOME CARE

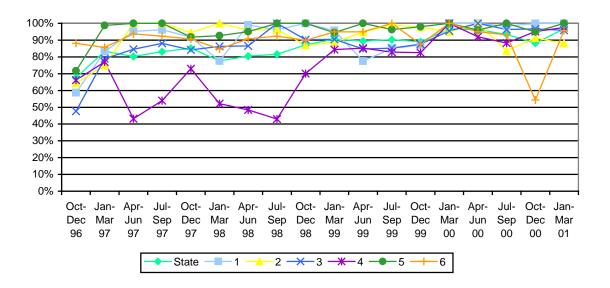

Visits with children in out-of-home care: State and Regional Trends

Percent of children in DCFS placement who are visited by their social worker two times per month with at least one visit per quarter occurring in the caretaker's home.

Presented data is from former measure of percent of children seen every 90 days

Supporting Client Outcomes (Organizational Well Being): Foster Care Licensing Applications

Delayed Foster Home Licensing Applications:

Number of foster care licensing applications that took more than 90 days to complete

(See Well Being Appendix for Calculation Details)

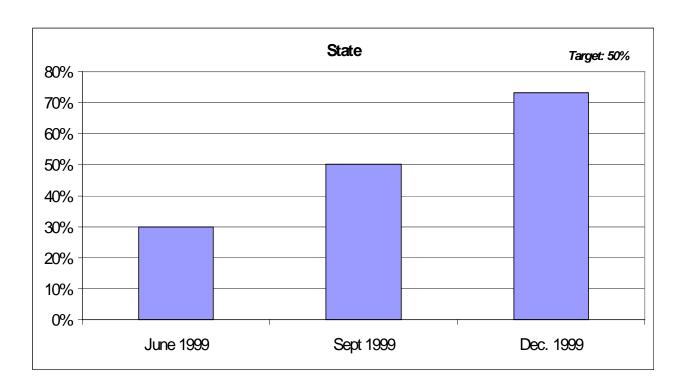

State and Regional Trends

Supporting Client Outcomes (Organizational Well Being): Childcare Provider Training

Provide quality licensed child care resources:

Percent of childcare providers who meet the 20-hour training requirement

WELL BEING APPENDIX

Well Being: Relative Placement

<u>Calculation:</u> Numerator is the # of children in placement with a relative, open at least 30days on the last day of the quarter. Excludes guardianships (source CAMIS). Denominator is the number of children in placement at least 30days on the last day of the quarter. Excludes guardianships (source CAMIS).

Well Being: Parent-Child Visitation

<u>Calculation</u>: Handcount of open placement cases on last day of quarter where child was visited by parents or permanent caretaker at least once within the last 30 days. Denominator – CAMIS count of children in placement at least 30 days on the last day of the quarter, with a permanent plan of reunification.

Well Being: Foster Care Licensing Applications

Calculation: Data obtained from CAMIS Monthly Statistical Report-Regional Licensing Action (LICRPT40).
